Subject: Approval of Travel

I am requesting approval of travel for Victor K and Robert Parker to travel next week to Montana for multiple purposes. Primarily at the request of Senator Tester's office they will be meeting with local officials and beginning the reconnaissance of the Columbia Falls Aluminum Smelter. The senators aid has set up a series of meeting that will be attended by EPA, MT DEQ and local officials. They will take advantage of being in Montana to conduct site visits at two other site assessment projects, Phillipsburg Mining district and the Eureka Solvents site. This is all mission critical work related to the function of Site Assessment and is time critical as it was driven by Senator Testers office. It is in our planning budget and is superfund site specific travel.
